*Total of 46 Large MDLs filed since 2007. 16 were completely terminated. (Termination dates were based on docket of fewer than 5 cases. Several MDLs have 1 case pending for long periods of time, presumably to retain jurisdiction and handle problems that arise with all cases.) 30 MDLs remain pending as January 15, 2022, the parentheticals indicate the percentage of cases that remain active and pending.
